

Slide&Stack

Slide & Stack is a versatile multidirectional top hung sliding system with stacking options that allow each panel to be stored away from the opening.

The versatility of Slide & Stack makes it perfect for creating room dividers, meeting rooms and quiet zones or pods.

Key Features

- Helps to divide areas quickly and easily
- Panels can be stored away neatly
- Suitable for panels weighing up to 150kg

Benefits

- Highest quality components to give you peace of mind
- Full technical support
- Tailored to fit your exact needs and requirements

Slide & Stack Components

The handing of the system is determined by the flange position circled in the diagrams below.
