

Apartmento

Wardrobe Sliding Door System

The Apartmento bottom rolling sliding system is designed for large and small wardrobe doors, weighing up to 60kg.

With its smooth gliding action and soft close and open feature, it is suitable for high quality bespoke projects and for volume production. Ideal for built-in applications. Apartmento is a double track, bypassing system enabling multiple doors to slide behind each other.

-  Featuring high quality components
-  Maximum door panel weight of 60kg.
-  Full technical support
-  Adjustable Sliding Solution
-  Soft Open & Soft Close included
-  Smooth gliding action when operating
-  Suitable for inset doors
