

The Series 450 is suited to heavier doors which are used in hygiene-sensitive environments, as well as in harsh weather conditions and salt water exposure.

All the brackets, components, door tracks and channels are manufactured from high grade stainless steel, resulting in excellent corrosion protection of sliding door assets over many years.

Series 450

Straight Sliding and Conveyor System

Suitable for panels up to 450kg.

Featuring high quality components

Full technical support
