A MAMMOTH INDUSTRIES COMPANY

Mammoth Industries is a privately owned company with our origins in Melbourne Australia. Our company is a leading producer of Rolling, Folding and Stacking systems throughout a number of different industries across the globe. The key to our success is our ability to listen to our client's needs and take an innovative approach to product development, through to engineering and then on to manufacturing. This approach gives our client's a finished product that is easy to use, well-functioning and of a superior quality.

Craig Lang, Managing Director and Founder of Mammoth Industries says, "Having worked in the industry for many years I could see the way that manufacturing was rapidly changing and realised early on the only way to keep in front, and offer our client's the best solutions would be to partner with some of the leading manufacturing facilities around the world. Each of these companies have their own unique capabilities allowing us to access all the latest machinery and manufacturing methods available today. This manufacturing principle combined with our leading engineering and design team enables us to offer our clients the best solutions for their applications and not just the best solution based upon what products are available. I'm proud of the fact we have built an enviable reputation for quality and reliability and now have established long term clients throughout Australia, North America, Europe and Asia. We believe by working with our company and utilising our 100 plus years of design and industry experience we are able to offer your company a competitive edge in your chosen working environment. We listen, understand your needs, offer solutions and become a partner in helping your business to grow."

Mammoth Industries will "make your ideas move".

FULL HEIGHT DOOR SYSTEM

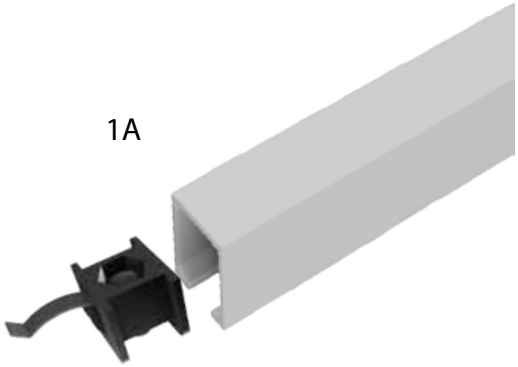
FITTING INSTRUCTIONS

STEP 1. INSERTING END CATCH

1. Hold end catch with screw head facing down and catch finger facing the outward direction and insert into track at track opening (1A).

2. Slide in track to position required and tighten screw to hold firmly in place. The stop catch can be adjusted after door fitment if required.



1A

STEP 2. INSERTING FRONT & REAR TROLLEYS

1. Insert rear trolley first. The rear trolley can be identified as it will be located in the 1st hole of the full height door bracket. (2A)
2. Insert front trolley. The front trolley can be identified as it will be located in the 2nd hole of the full height door bracket. (2B)
3. Slide trolleys along the track to the required locations. Be sure the brackets are sitting well below the track for easy installation.

FITTING INSTRUCTIONS

Rear Door View

Slide into door bracket

Front Door View

Fix spear to door bracket via this screw hole

STEP 4. FITTING OF TROLLEYS TO FULL HEIGHT DOOR BRACKET

1. Router the required channel for the full height door bracket into the top of the door, at each end of the door.

2. Fix full height door bracket into channel with screws provided.

3. Whilst holding the door, carefully slide the rear trolley and spear into the back door bracket. Proceed to fix the spear into the door bracket with the small screw provided, through the end hole of the spear as shown in diagram. This is followed by sliding the front trolley and spear into the front door bracket. Proceed to fix the spear into the door bracket with the screw provided.

FITTING INSTRUCTIONS

STEP 5. DOOR ADJUSTMENT

1. Using the spanner provided adjust the door height up to requirement.

   Ensure both ends are adjusted equally to ensure a level operating door.

2. Ensure door catch is catching the door in the correct position.

   Simply loosen screw and slide along track until desired postion is located.
